DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of species in the reply filed on 6/8/2005 is acknowledged.
2. Claims 3-9, 13, and 15 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/8/2005.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12, 14, 16, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ciccone et al (3,734,020) in view of Ajayan et al (US 2003/0183504).

Ciccone et al discloses a energetic composition that comprises carbon black and metal such as aluminum(col. 3). The use of carbon nanotubes is not disclosed.

Ajayan et al teaches that carbon nanotubes are light ignitable and can be added to energetic compositions to light ignite them.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the carbon nanotubes with an energetic composition since Ajayan teaches that they are useful in such applications for light ignition of the compositions.
